

DSAB LIFT

ELEVATOR & VERTICAL TRANSPORTATION SOLUTIONS

Elevating Every Possibility

COMPANY PROFILE

2026

ABOUT US

Engineering Vertical Mobility for Indonesia

DSAB Lift is the elevator and escalator division under PT DSAB, bringing vertical transportation solutions to hospitals, hotels, offices, malls, and residential developments across Indonesia. DSAB Lift operates as the authorized sales and after-sales service partner of FUJIYANG Elevator & Escalator, a manufacturer built on cooperation with FUJI Japan for product design and quality control.

Every unit — from passenger and hospital elevators to escalators and moving walks — is backed by FUJIYANG's manufacturing capability and DSAB Lift's local sales, installation, and 24/7 after-sales service network based in Jakarta.

OUR PRODUCTS

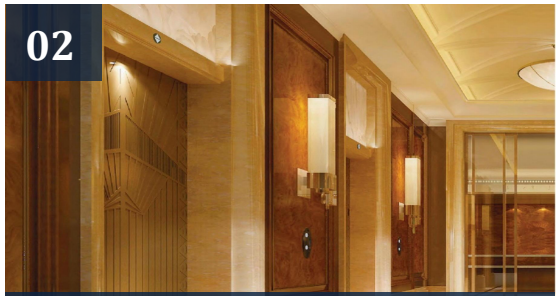

A Complete Vertical Transportation Range

01

Hospital Elevator

02

Passenger Elevator

03

Moving Walk

04

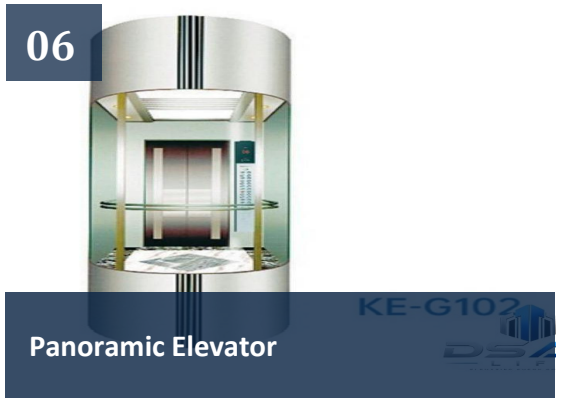

Car Elevator

05

Escalator

06

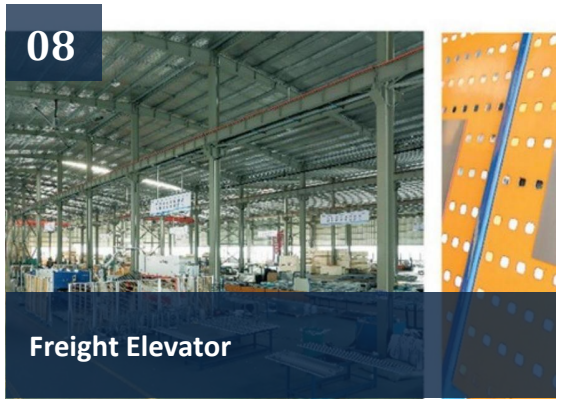

Panoramic Elevator

07

Home Elevator

08

Freight Elevator

PRODUCT RANGE

01

Hospital Elevator

Hospital elevators are specially designed to meet the demanding requirements of healthcare facilities. With a strong focus on safety, hygiene, smooth operation, and passenger comfort, these elevators provide reliable and efficient transportation for patients, medical staff, and visitors throughout the hospital.

KEY POINTS

- Hairline stainless steel cabin wall and handrail (model KE-B101)
- Axial fan ventilation with LED energy-saving ceiling lights
- Center, telescopic, through, and 4-panel opening configurations
- PVC flooring suited for stretcher and bed transport

PRODUCT RANGE

02

Passenger Elevator

Our passenger elevators are designed to provide safe, smooth, and comfortable transportation for residents, tenants, employees, and visitors. Suitable for low-rise, mid-rise, and high-rise buildings, they combine reliable performance, modern design, and efficient operation to meet a wide range of passenger transportation needs.

KEY POINTS

- Hairline and mirror-etched stainless steel cabin finishes
- Machine-roomless and small machine room configurations
- Rated speed up to 7.0 m/s with integrated controller
- Wide range of car decoration options (KE-J101 series)

PRODUCT RANGE

03

Panoramic Elevator

Space-creating design that fulfills great splendors. FUJIYANG panoramic elevators apply highly secure laminated glass cabin wall material, preventing energy loss with effective sound isolation, while large-area cabin glass creates the best sight-seeing vision for passengers.

KEY POINTS

- Semi-circular, square, cutting-angle, and bulb cabin shapes
- Laminated safety glass with sound-isolation performance
- Smooth outline design adds charm to any building façade
- Ideal for hotel atriums, malls, and observation towers

KE-G102

PRODUCT RANGE

04

Home Elevator

Home elevators bring accessible, comfortable mobility to private residences without requiring a traditional machine room or adding construction cost. VVVF drive technology and appropriative micro-processing control deliver smooth, quiet operation for everyday family use.

KEY POINTS

- No traditional machine room — no added construction cost
- VVVF drive with micro-processing control
- Traction machine bracket mounted on guide rail, no building load
- Automatic door operator with synchronous timing belt, CE certified

PRODUCT RANGE

05

Freight Elevator

Freight elevators are engineered to safely transport heavy goods, equipment, and materials between different levels of a building. With robust construction and high load capacity, they are ideal for warehouses, factories, commercial buildings, and industrial facilities where durability and dependable performance are essential.

KEY POINTS

- Reinforced cabin construction for heavy and bulky loads
- Robust car and counterweight guide rail systems
- Machine room and machine-roomless configurations available
- Built for warehouses, factories, and logistics facilities

PRODUCT RANGE

06

Car Elevator

Car elevator solves the technical difficulties of noise and shaking cabin due to uneven outer force, offering maximum convenience, safety, and comfort. It provides a safe and efficient solution for transporting vehicles between different floors of multi-level parking facilities.

KEY POINTS

- Cabin available with two entrances for drive-through parking
- Double car operating panels (COPs)
- Dedicated safety-protecting device for vehicle loads
- Special circuit control and display system

PRODUCT RANGE

07

Escalator

Escalators are designed for efficient and continuous passenger movement in high-traffic environments. Suitable for shopping centers, supermarkets, subway stations, airports, and commercial buildings, they combine reliable performance, safety features, and modern design to provide smooth and convenient vertical transportation.

KEY POINTS

- Heavy-duty public transport escalator up to 25 m travel height
- Customizable balustrade, handrail, and step-front lighting
- Strictly designed safety devices on every unit
- Exquisite structure, superior step, and delicate belt design

PRODUCT RANGE

08

Moving Walk

Moving walks provide a convenient and comfortable way to move people efficiently throughout large buildings and public spaces. Ideal for shopping centers, airports, transportation hubs, and commercial facilities, they offer smooth and safe movement while improving accessibility and the overall passenger experience.

KEY POINTS

- Designed for continuous large-volume pedestrian flow
- Suited to airports, transit hubs, and shopping centers
- Intelligent variable speed control system available
- Strictly designed safety devices throughout

Engineering Built Around Performance

FUJIYANG gearless traction machines and the integrated controller platform underpin every DSAB Lift installation — engineered for smooth acceleration, precise leveling, and dependable long-term operation.

- **Gearless Machine**

  Rated capacity up to 3,000 kg with permanent magnet synchronous motors (GTW9S, GTW10, GTNH2, GTN3 series). Noticeably lower noise than traditional geared traction machines.

- **Integrated Controller**

  Rated speed up to 7.0 m/s. Optional voltage stabilizer and Elevator Auto Rescue Device (ARD) safely return the cabin to the nearest floor during a power interruption.

- **Destination Dispatch (DDS)**

  Allocates passengers to cabins by destination floor at the hall panel, reducing congestion and minimizing waiting and travel time.

- **Energy Saving System**

  LED downlights cut lighting power consumption by roughly 75% and last around 12.5× longer than incandescent lamps.

SMART & SAFETY FEATURES

Comfort, Hygiene, and Intelligent Control

Non-Contact Safety Ladder

Anion car ventilation plus UV-ray sterilizing light provide simultaneous air exchange and disinfection, without producing ozone.

Human-Face Recognition

Dynamic entry camera recognizes passengers and automatically registers the floor call, cutting cross-infection risk from shared button contact.

Voice Calling

AI-driven voice body-protection system calls the elevator and sets the destination floor through natural man-machine dialogue.

Cell-Phone App Floor-Selection

A dedicated app pre-sets the destination floor and completes calling via WiFi, Bluetooth, or offline signal as passengers approach.

MANUFACTURING EXCELLENCE

Precision at Scale

FUJIYANG operates a 66,000 m² modern standard factory equipped with sophisticated metal plate production lines, permanent magnet synchronous machine assembly lines, door operator manufacturing, and dedicated escalator and moving walk production — supported by a 100-metre elevator testing tower with 7.0 m/s testing capability.

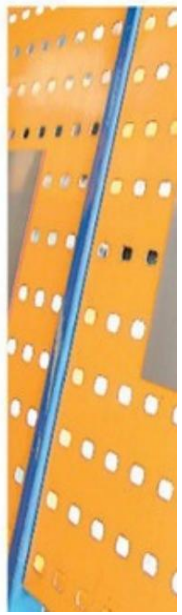

CERTIFICATIONS & QUALITY

Quality Systems Behind Every Installation

Every FUJIYANG elevator, escalator, moving walk and its complete accessories are manufactured under a fully implemented management system, with international certification supporting the global market and service network DSAB Lift draws on locally.

ISO 9001

Quality Management System

ISO 14001

Environmental Management System

OHSAS 18001

Occupational Health & Safety

CE

European Conformity

SASO

Saudi Standards Conformity

CU-TR

Eurasian Customs Union Conformity

Market and service network across 50+ countries in Asia, Europe, Africa, America, and Oceania.

INTERIOR CUSTOMIZATION

Cabin Finishes to Match Every Building Standard

From hairline stainless steel to mirror-etched gold finishes, cabin walls, ceilings, handrails, and flooring are configurable to suit hospitality, corporate, and residential interiors.

KE-J101

Hairline stainless steel, acrylic ceiling

KE-J102

Mirror stainless steel, glass side panels

KE-J111

Mirror etched gold, gold handrail

KE-J112

Mirror etched gold with floral motif

APPLICATIONS

Solutions for Every Building Type

Healthcare

Hospitals & medical facilities

Hospital / bed elevators sized for stretchers and patient beds

Hospitality

Hotels & resorts

Panoramic and passenger elevators finished to hospitality standards

Commercial

Offices & shopping malls

Passenger elevators, escalators, and moving walks for high traffic

Residential

Apartments & private homes

Passenger and home elevators for low- to high-rise living

Institutional

Government & public buildings

Passenger elevators referenced in DSAB Lift's project portfolio

Industrial

Factories & warehouses

Freight elevators built for heavy and bulky material handling

MARKET COMPARISON

How FUJIYANG Compares

Passenger elevator segment (630 kg / 8-person to 800 kg / 10-person) vs. global brands

Parameter	FUJIYANG	KONE	Schindler	Mitsubishi Electric
630 kg / 8 orang	**Ya**	Ya	Ya	Ya*
800 kg / 10 orang	**Ya**	Ya	Ya*	Setara
Kecepatan tertinggi (katalog)	**Hingga 7,0 m/s**	s/d 2,5 m/s*	s/d 2,5 m/s*	s/d 2,5 m/s*
Gearless machine	**Ya**	Ya	Ya	Ya
Machine Roomless	**Ya**	Ya	Ya	Ya
Destination Dispatch	**Opsional**	Sistem tertentu	Tersedia	Sistem tertentu
ARD / Auto Rescue	**Ya / opsional**	Tergantung konfigurasi	Tergantung konfigurasi	Tergantung konfigurasi
Positioning pasar	**Value for Money**	Premium	Premium	Premium

**Konfigurasi dan kecepatan bervariasi menurut seri/model masing-masing merek; bandingkan pada spesifikasi yang setara.*

MARKET POSITIONING

Modern Technology. Competitive Value.

FUJIYANG is not positioned as “the best brand above all others” — it is positioned as the smart alternative: elevator technology on par with premium brands, at a more competitive price with complete local service.

> *“Modern Elevator Technology with Competitive Specification and Professional After-Sales Service.”*

BRAND POSITIONING MAP

FUJIYANG	Value for Money / Competitive
KONE	Premium Global Brand
Schindler	Premium / High Technology
Mitsubishi Electric	Premium Japanese Technology

WHY FUJIYANG

11 Reasons to Choose FUJIYANG Elevator

14+ Years

Established experience in the elevator industry

1,000+ Units

Installed across government and private sector projects

1.5–2 Months

Fast procurement — components always ready stock

Japan Technology

Engineering heritage rooted in Japanese standards

3-Year Warranty

Longer product warranty than typical market offers

12-Month Free Service

One full year of free maintenance included

25–30 Year Spare Parts

Spare part availability guaranteed for the elevator's lifetime

Rp 1 Million / Month

Light maintenance cost after the free-service period

1 Week Installation

Fast installation time per elevator unit

20+ Year Technicians

Experienced, specialist installation and service teams

Registered Trademark

Officially registered with Menkumham (HAKI protected)

WHY CHOOSE US

Why Choose DSAB Lift

01

Authorized Partner

Official sales and after-sales service partner of FUJIYANG Elevator & Escalator in Indonesia.

02

Engineering Backed by FUJI Japan

Product design and quality control developed in cooperation with FUJI Japan.

03

Proven Track Record

Completed installations across hotels, hospitals, malls, offices, and government buildings nationwide.

04

Full Product Range

Passenger, hospital, panoramic, home, car, and freight elevators plus escalators and moving walks.

05

Certified Quality

ISO 9001, ISO 14001, OHSAS 18001, and CE / SASO / CU-TR conformity across the FUJIYANG product line.

06

24/7 Local Service

Dedicated after-sales support and customer service line based in Jakarta Selatan.

Let's Move Your Project Forward
